

## Air conditioned Underwear

Verse.1.

Sometimes I'm way too hot, sometimes I'm way too cold  
I needed a solution before I got too old  
I'm so tired of shivering and I'm fed up with sweating  
And now that we've got climate change, You don't know what you're getting  
I've got a new invention try it if you dare, I know you're gonna love it  
My airconditioned underwear.

Chorus.

Too hot too cold, too hot too cold we all need life to be temperature controlled  
Too hot too cold, too hot too cold, I know you wanna share  
My airconditioned underwear

Verse.2.

I get up in the morning, takes time to put in on,  
making sure the batteries are charged, or it won't last too long  
Everybody wants it, that's to be expected, but they aint gonna get it until it is  
perfected,  
now got your attention, excitement's in the air, I know you're gonna love it  
My airconditioned underwear

Repeat chorus.

Verse.3.

It needs a few adjustments, just a little tweeking  
I was on the dance floor when the darn thing started leaking  
Dancing with a beautiful girl, I could feel romance  
Until she saw a huge wet patch, appearing on the front of my pants  
So I installed a collection tank, I aint gonna tell you where  
It's still a revolution, my airconditioned underwear

Repeat chorus. End.
